NOTES:

Carpet Detail Sheet - What to Expect

Thank you for purchasing a flooring Detail measurement from Lowe's. After your measurement is complete, the information will be sent to the Store and your Lowe's associate will create a complete quote for your review. If you have any questions regarding the Detail or installation, please contact the Store. Outlined below is important information about the installation process. It will help you understand what to expect before, during and after your installation project.

Scope of work:

- Lowe's does not remove existing vinyl flooring.
- Lowe's does not install carpet over old pad, because it voids the warranty on the new carpet.
- Seam placement must be discussed and finalized during the measurement. Seams are not invisible. Carpet is normally available in 12' or 15' widths. Customers are able to directly affect the number, type, and placement of seams by the amount of carpet and the width of carpet they elect to purchase. Typically having fewer seams requires purchasing more carpet. The installer will provide the Store a seam diagram for the customer to approve at time of purchase.
- Pattern carpets require additional carpet for pattern matching and additional charges to perform the match.
- The installer will provide a breakout of number and type of stairs, number of balusters, and style of stair carpeting for the customer to approve.
- Tack strip is normally reused. (Re-nailing as necessary and replacement of a small number of tack strips is included.)
- Cutting interior wood doors is a service Lowe's offers, but it is not included in the basic labor price. Metal doors cannot be trimmed by Lowe's.
- Please advise the installer and Lowe's of any previous floor issues such as water leaks or damage.
- Unforeseen circumstances discovered once installation begins such as damaged subfloor, wet subfloor, pet urine soaked carpet, insect infested carpet, unlevel or uneven subfloors, termite damage, etc. can cause additional charges which must be approved by the customer and the Lowe's Store and paid directly to Lowe's

Furniture Moving:

- The Lowe's installer will move normal household furniture (on the day of install), if you have paid for this service.
- Installers cannot move certain items such as antiques, electronics, pianos, pool tables, waterbeds, aquariums, safes, pin ball machines, exercise equipment, etc. Many of these items need to be professionally moved.
- If additional charges apply for moving excessive or oversized furniture, the installer will advise the customer and the additional charges will be included in the quote from your Lowe's sales specialist.

Prior to day of install:

- Make arrangements to have your furniture moved and existing flooring torn out and removed from all rooms receiving new carpeting prior to the day of installation, unless you have paid for these optional services through Lowe's.
- The area to receive new flooring must have climate control, power and adequate lighting a minimum of 48 hours before and after installation.
- Unplug all items; disconnect and remove all electronics (computers, stereos, large screen TVs, VCR, DVD, etc.)
- Empty closet floors up to 3 feet high, remove items under beds, bed coverings, lamps, knick-knacks, fragile, high value, sentimental value items and antiques
- Remove glassware from china cabinets, remove books from freestanding bookcases and pictures from walls
- If there are pet soiled areas, the customer must have them cleaned prior to the installation.

Day of Install:

- The Lowe's installer will move normal household furniture, tear out and haul away your existing flooring, if you have paid for these optional services. If not, you will need to make arrangements to have this done prior to the day of installation.
- A responsible adult must be present for both the Detail and installation.
- Installer will verify correct new flooring with customer prior to starting job
- Identify for the Installer any wiring (may be hidden behind moldings) in the new flooring area (alarm, monitoring systems, etc)
- Let Installer know if you would like to keep existing flooring and where to put it
- Please ensure children and pets are not in the installation area during the installation.
- Potential exists for minor scuffing of baseboards/walls. (Note: scuffing will be worse with new paint.)

We look forward to serving you and will strive to exceed your expectations. At the conclusion of the job, we'll follow up to make sure the project was completed to your satisfaction. Your feedback is important to us. You will receive a call from our Lowe's Customer Service Group asking you to rate the craftsmanship and professionalism of the Installers. Please take a few minutes to give us your feedback so that we can continue providing our customers with the best possible service. Thank you!
